A photograph of a family on a boat. An older man with white hair, wearing an orange life vest, is smiling and looking at a young girl. The girl is also wearing an orange life vest and a blue beanie, and is looking up at the man. Another person wearing an orange life vest is partially visible on the right. The background shows a body of water and trees.

If people should age at their own homes, how to align **technological** development with the **building** industry for smart environments in terms of **POLICY** and **FUNDING**, enhancing a **more efficient health care system** that may add **better quality** for less investment?

THE AIM

SHARED RESPONSIBILITY ON COMMON GOOD

The challenges of different sectors, such as ICT, the building industry and urban planning and the health and social care, as well as those of citizens and their communities are interlinked.

Responding to these challenges will foster awareness and support for the creation and implementation of smart, healthy and inclusive environments for present and future generations that enable them to learn, grow, work, socialise and enjoy a healthy life, benefiting from the use of digital innovations, accessibility solutions and adaptable support models in the European context.
